DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

1. Claims 1-7 are rejected under 35 U.S.C. 102(b) as being anticipated by Castenmiller (US 4,874,626).

Regarding claim 1, Castenmiller ('626) teaches a mousse-type spread, which comprises a water-in-oil type emulsion or a composition in the form of a water-in-oil type emulsion by conducting a mixing in use and a gas propellant (*See col. 3, ll. 27-52, col. 5, ll. 5-43, col. 6, l. 56 to col. 7, l. 15. The product is interpreted as being a spread, not a package, not a container and not how it is made or used or how it is placed into or taken out of the container or how it may be foamed or jetted.*).

Regarding claims 2, 5 and 7, Castenmiller ('626) teaches wherein an emulsifier is a glycerin fatty acid ester or an enzyme-processed lecithin is used for preparing the water-in-oil type emulsion (*See col. 5, ll. 5-43, col. 6, l. 56 to col. 7, l. 15. The soybean plant is known to use biological enzymes in the synthesis of lecithin.*).

Regarding claim 3, Castenmiller ('626) teaches wherein the water-in-oil type emulsion is butter (*See col. 5, ll. 5-43.*).

Regarding claims 4 and 6, Castenmiller ('626) teaches a mousse-type edible oil, which comprises an edible oil, an emulsifier and a gas propellant (*See col. 3, ll. 27-52, col. 5, ll. 5-43, col. 6, l. 56 to col. 7, l. 15.*).

The phrases "which is used as a spread" in claims 6 and 7, lines 1-2 of both claims are deemed to be statements with regard to the **intended use** and are not further limiting in so far as the structure is concerned (*see MPEP 2111.02*). Castenmiller's ('626) product is clearly capable of being used as such.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to BRENT T. OHERN whose telephone number is (571)272-0496. The examiner can normally be reached on Monday, Tuesday and Thursday, 9:00-6:00.
